WORK & EXPERIENCE

01/2025 - 04/2025

Software Programming Intern

WSP Canada - Laval, Quebec

- Developed in-house user-friendly applications designed for company needs, such as making front-end HTML modifications to make the user experience more enjoyable
- Participated in code reviews, refining programming skills and learning from experienced colleagues.
- Used Azure Functions, Docker, Power Automate and Python to automate client Excel files processing system, saving time and making the team more productive.
- Created a PDF file converter in Python for client contracts that would allow to automatically organize large amounts of documents
- Mainly worked with MS Power Apps, Power BI, JavaScript, HTML and Python

05/2023 - 08/2023

Smart Sales Intern

Bombardier - Montreal, Quebec

- Was responsible for keeping track of customer aircraft flight hours and status.
- Took part in a Case Competition in a team of 4 engineers, presenting an AI integrated plane maintenance model. Leveraged MS PowerApp and PowerBI in finding the best combination of parameters of previous data to forecast future behavior.
- Involved in organizing cross-functional teams, setting sprint goals, conducting daily stand-ups.
- Implementing rigorous testing and debugging processes, including unit tests and integration tests, ensuring our software met quality standards.

07/2022 - 08/2022

Capital Market division Intern

Kookmin Bank - Singapore

- Supported senior bankers with market research, data analysis, and financial models to facilitate informed decision-making.
- Played a key role in creating client presentations and pitch materials, maintaining a high standard for company image and professionalism.
- Exhibited strong analytical abilities while preparing balance sheets and conducting risk assessments.

06/2019 - 07/2019

Hangar of the Future Project Intern

Airbus - Singapore

- Introduced to the office work environment - Gained insight on how Airbus planes are taken care of while in hangars
- Worked on the Hangar of the Future Project which had for mission of integrating AI into aircraft maintenance checks
- Delivered high-quality presentations on project updates and findings to senior management and stakeholders.
